TITLE : MOLD ASSEMBLY

ABSTRACT : PURPOSE: To realize the sure falling down of a molded body.

CONSTITUTION: This mold assembly is equipped with a first mold 1, a second mold 2, which molds a molded body M by being clamped together with the first mold 1, and four supporting pins 3, which slidably support two plates 11 and 12 interlocking with the first mold 1. when the second mold 2 is horizontally opened from the first mold. Two supporting pins locating below are so constituted as to provide insertingly holding parts 32, which holds the state being inserted in vent holes 2a provided in the second mold 2 when the molds are opened, at one end of each pin. Accordingly, the opening part of each vent hole 2a is not exposed by means of the insertingly holding part 32, resulting in surely falling down the molded body M without its mixing due to its fitting in the vent hole 2a.
